

Where is it breaking?

Timothy Kabwe · Project and Data Analyst

PMTERRAIN

The starting point

32 projects

One screen

Fictional portfolio

A pretty chart is not a decision

Shows what happened

Shows what to check first

Three numbers

CPI → cost

SPI → schedule

EAC → where it ends

One portfolio, every department

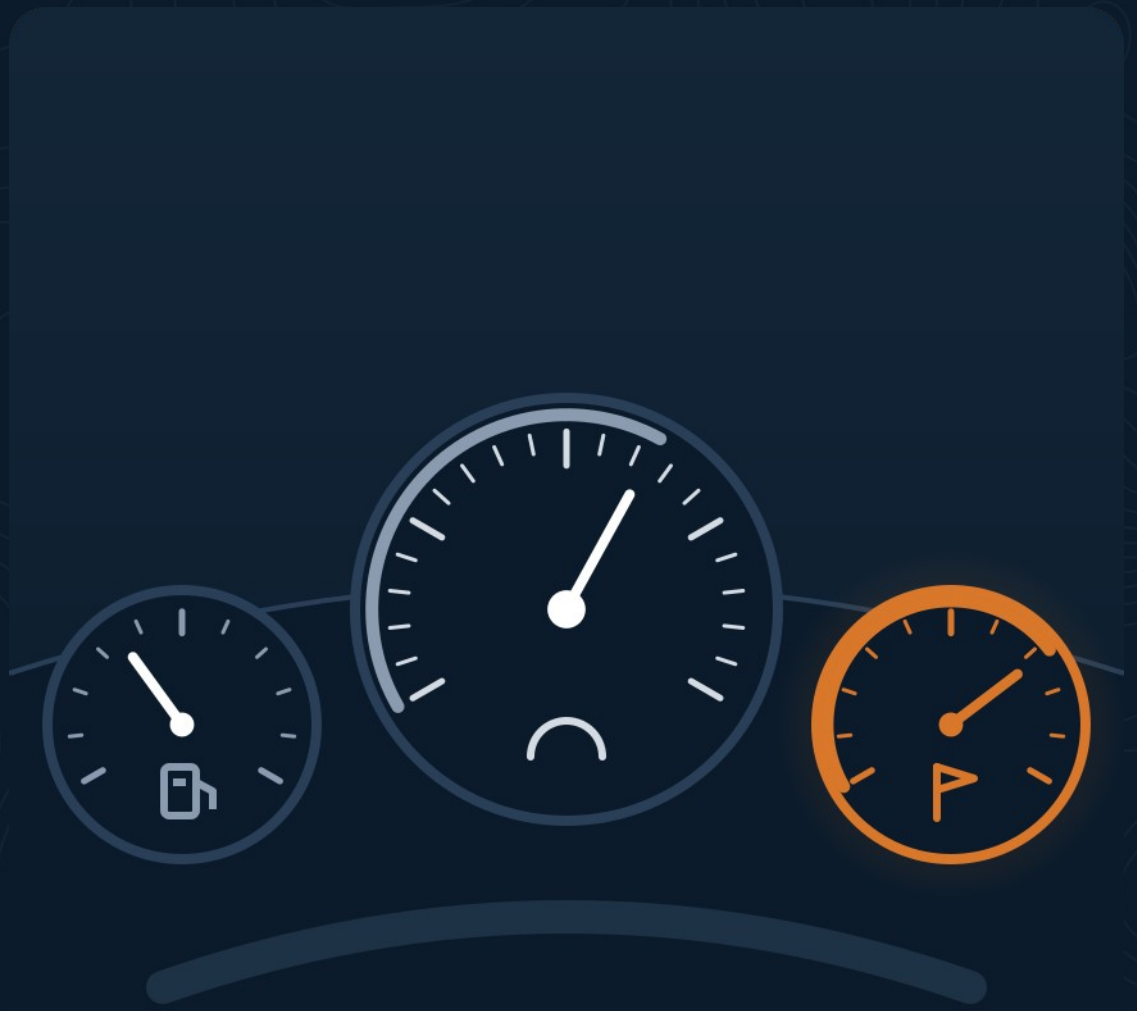

A dashboard is a car dashboard

Fuel = cost

Speed = schedule

Range left = EAC

The point

Decide what to look at first

What is the first number you check?

#PMO #PowerBI
